

Fouls, Rotations & Free Throws

❑ **Fouls: Take care of:**

- 1) **Your Mechanics First/ Communicate to Your Partners (show spot or # of shots) then report to the table using appropriate mechanics**
- 2) **On shooting Fouls: after reporting foul, Calling official confirms to Trail # of shots & then goes opposite table. When in position, new Trail confirms ready to go with table (check for subs, 5th foul, etc.) & initiates sequence: Trail to Center/ Center (check table for subs) & then to Lead / Just like before.**
- 3) **5th Foul Procedure: Confirm all officials aware of 5th foul. Discuss patience on administration & wait to administer ball until all ready**
- 4) **Trail & Center step down after release, Lead step back: Don't bail!**

- ❑ **Fouls: Discuss Rotations in both frontcourt and backcourt**
- ❑ **Remember mechanics change: If foul is called in frontcourt, the calling official reports the foul then goes opposite table**
- ❑ **Discuss positions on action & non-action free throws**
- ❑ **In the diagram: where should C report if in backcourt? In frontcourt?**
- ❑ **Where will everyone go after C reports foul in backcourt? Frontcourt?**
- ❑ **Make sure non-calling officials focus on dead ball activity**
- ❑ **Pause & Assess: get the call, administration and rotations right**
- ❑ **Review rule clarifications to lane violations and fouls: Timing is everything when enforcing these rules**
- ❑ **Stay Focused / Own Your Primary**
